Subject: Against oil and gas exploration within Sable Island National Park Reserve.
Date: February-02-19 2:02:01 AM

Dear Minister McKenna,

I am very concerned about oil and gas exploration occurring within Sable Island National Park Reserve. I do not support this at all, including subsurface drilling.

It is vital that protected areas are exactly that: protected for the species that live there and for future generations. Furthermore, parks must be managed to prioritize ecological integrity.

Sable Island has been on my Canadian parks “bucket list” for a long time. I remember learning about it as an undergraduate biology student, particularly about sand dunes and fragile ecosystems. I am against oil and gas drilling in this wonderful national park reserve.

Please stand up for parks and do not approve this activity in Sable Island NPR.

Thank you.
