Subject: I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve.
Date: January-31-19 1:30:05 PM

Dear Minister McKenna,

I do not support oil and gas exploration in and around (all land mass and navigable waters of the park) Sable Island National Park Reserve. In addition, as Minister for Environment and Climate Change Canada, you should be aware that Canadians need to lessen their carbon foot print and invest in green, sustainable power sources. Wind and hydro-power, off shore on the east coast of Canada make vastly better sense.

Do not allow our government to be seduced by corporate disingenuous around exploration, transport, and production of further petrochemical resources. Petrochemical resource-use is highly subsidised and future generations will pay the cost of climate uncertainty and clean up after our excessive petrochemical use and abuse. I strongly urge you to limit oil and gas exploration, extraction, and transport on both Canadian coasts.

Thank you,

Laurie Ann Henderson

P.S. This is one of the most gorgeous marine parks I have ever seen. Please do not jeopardise such a unique resource.
