Subject: I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve
Date: February-08-19 12:07:34 PM

Dear Minister McKenna,

I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve. Parks Canada website states that "National parks are a country-wide system of representative natural areas of Canadian significance. By law, they are protected for public understanding, appreciation and enjoyment, while being maintained in an unimpaired state for future generations." Allowing oil and exploration within a National Park goes against this very statement and the very reason why Canadians across the country have supported the creation of National Parks. Oil and gas exploration on Sable Island poses a huge threat to this globally rare ecosystem and sets an awful precedence for future National Parks.

National parks are no place for oil and gas exploration. Sable Island is such a special place that people across Canada hold close to their heart. Please properly protect it.

Thank you,

Meghan Borland
