Dear Minister McKenna,

I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve. By its' very nature - it is meant to be unused, protected and retained/preserved for future generations. Not only is it home to the wild horses; it also hosts over 350 species of birds with 16 species known to breed there. It also has the world's largest breeding colony of grey seals. Don't tell me Minister McKenna that in this day and age where we're desperately trying to save what little we have left of the natural world you want the destruction of Sable Islands' delicate ecosystem to be your legacy. I ask you to think about that and then take the appropriate action.

Thank you,
