Subject: I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve.
Date: February-03-19 10:48:04 PM

Dear Minister McKenna,

I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve. These RESERVES have been classified as a reserve for a reason. There should be no reason that any exploration should be acceptable. When governments start allowing "explorations" in national parks you are contradicting the point of these parks being a reserve. Please recognize that the more we "explore" and destroy the areas that are or should be protected the less we leave for the generations ahead of us. WHEN will our governments realize that money is not always the future and start to put thought into our future generations and what it is we need to protect and leave for them. Take this into consideration of what the actual damage is before you consider the financial and economical impact this has, because that is not always the answer. Become a leader instead of a follower stand up for the protection of the environment and our future.

Thank you,

Alicia Giroux
