Subject: I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve.
Date: February-01-19 1:48:01 AM

Dear Minister McKenna,

I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve.
I am stunned that our government which speaks about dedication to environment, would ever allow it.
My vote will always go to, and my gratitude and pride and relief as a Canadian, will always go to elected officials at every level who think of the country and the future health of the country Canada on the earth planet, before the desires of for-profit corporations of any nation.
It is time for us humans to consider that we are stewards of the Earth.
We are the creatures on the planet who can destroy or preserve it.
Every Canadian Government from now into the future, should consider the air, soil, water, before anything economic.
Each person and each group leave a footprint.
I support any action that decreases the size of our footprint.
I really wish that we could experience true change that is not linked and limited by a 4 year cycle.
Could we enshrine the right to clean air, soil, and water into the Constitution?
Could something be in place that demands of every future government that they look at the science, support good objective science and listen to scientists who can speak to the various aspects of utilization of any natural resource, or refining process?

I look forward to hearing your thoughts on these questions.
I look forward to hearing that there will be no gas and oil exploration near Sable Island.

Thank you,

VeronicaMurphy
