Subject: I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve.
Date: January-31-19 3:06:46 PM

Dear Minister McKenna,

I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve.

Humans are sliding down a very slippery slope and our pathological illusion of how the planet should work for us is catching up with our timely destruction of nature which includes all who reside on Earth. The human illusion for consumption and ownership of land and nature; that is-having more stuff is just that...our own special, narcissistic illusion. All the human ways to exploit nature (let alone each other) is fast coming to a head. The human species needs to grow up and grow out of our manufactured childish greed and start using the intelligence we were supposedly blessed with. It's getting late to act on saving us from our own destruction, so we desperately need to put our faculties to good use by developing new sustainable eco-friendly methods when building anything that moves (planes, trains, automobiles) that will create long-term solutions and not short-term energy vampire fat-cat at the trough feeding frenzy. It's kindergarten thinking to believe that we are not all connected to each other and to nature. It's kindergarten lifestyles we are living believing that consumerism brings us closer to our ultimate truth! We either worship the Universal God or we (as we are doing) worship the MONEY GOD! If our leaders do not get their head out of their kindergarten thinking and take responsibility for the mess they and previous political and corporate leaders have so blatantly created and dismissed, then your indifference, due to your lack of understanding the effectiveness of long-term solutions, makes YOU culpable and responsible for the rising of insurmountable planetary loss. Besides, the wild horses that have been on Sable Island for generations, will no longer be protected and they have an unconditional right to continue living on the land they were born on. We all know what a dirty, filthy oil/gas spill will do to marine life and birds! Please grow up...grow a heart, grow a spirit, grow the courage to change your mind and create a win-win. Enough of the win-lose childlike mindset. Your short-term greed is killing us all!

Thank you,

CydRedmon
