Subject: Let's ruin Sable Island National Park Reserve.
Date: January-31-19 5:38:47 PM

Dear Minister McKenna,

Oaky, the subject line is Fake News. I actually do **not** support offshore oil & gas exploration nor any exploration occurring within Sable Island National Park Reserve. It boggles the mind that Big Oil would even consider doing this.

As you know, the Canada-Nova Scotia Offshore Petroleum Board has put out a call for bids for oil & gas exploration off the coast of Nova Scotia that includes Sable Island National Park Reserve. One might think this board is made up of rational & well-meaning people that have the interests of Canada & Nova Scotia at heart. If "one" did think that I'd be asking what the Kool Aid is they're drinking.

This is insanity. We all know that we need to keep the existing reserves in the ground. This might've been misunderstood to mean that oil & gas under the water is okay. Again, what kind of Kool Aid are these people drinking?

You seem to be a rational person. Why not actually administer your portfolio and do something for the environment & help stop climate change, at least reducing the GHGs we're putting into the atmosphere.

If you need more information or want to discuss this further please don't hesitate to call me.

Sincerely,

marke slipp [REDACTED]
