Subject: NO oil and gas exploration at Sable Island
Date: January-31-19 4:36:04 PM

Dear Minister McKenna,

I'm sure you would agree that Canada's national parks are the jewels of crown assets. They were established to protect wild areas, because wildlife has a right to its habitat and because wild areas are crucial for a healthy environment. We all benefit from Canada's wonderful national parks.

Oil and gas exploration in a national park reserve poses unacceptable risks to wildlife. I urge you to cancel the proposal to allow such exploration in and around Sable Island off Nova Scotia.

We need wild areas. We do not need more oil and gas.

Thank you for your attention to this matter. Sincerely,

MarkFried
