Subject: Oil and gas exploration within Sable Island National Park Reserve.
Date: February-04-19 3:56:02 PM

Dear Minister McKenna,

I write to ask you to NOT support oil and gas exploration within Sable Island National Park Reserve. The island's natural wild beauty, its sand dunes and wild horses, must be protected, as was the intention in declaring it a national park reserve in 2013.

It is also clear that the short timeline of 12 years identified by climate experts as the period in which we must drastically reduce our carbon emissions make enabling new fossil fuel projects reckless. Canadians deserve government help for such reductions.

With an election looming, your government will be judged on its climate and environmental actions.

Thank you,

Phyllis Creighton
