Subject: Oil and Gas should not be a part of a National Park!
Date: February-02-19 4:22:06 PM

Dear Minister McKenna,

I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve. National Parks are meant to preserve and celebrate Canada's natural history. By allowing oil and gas exploration within the Sable Island NP boundaries, this is at risk.

To visit this unique, beautiful, delicate part of Nova Scotia, one must obtain a permit. This highlights how Canada wants to keep human interaction with this space low to help preserve its ecosystem. Why would we allow oil and gas to potentially risk all of that? It is not worth the revenue or job creation.

Please stop this bidding process and close off this National Park to oil and gas.

Thank you,

JordanGardiner
