Subject: Sable Island National Park Reserve is no place for fossil fuel extraction
Date: February-01-19 11:46:02 AM

Dear Minister McKenna,

Canada's national parks should NOT be subjected to oil and gas activities. Nor should Canada be permitting ANY more fossil fuels to be extracted. WE ARE IN A CLIMATE EMERGENCY. We MUST end our use of fossil fuels as soon as humanly possible if we are to avoid climate catastrophe.

I do NOT support oil and gas exploration occurring within Sable Island National Park Reserve. Please do NOT allow these activities to proceed.

Thank you,

StuartRogers
