Director Christine Bonnell-Eisnor,

As much as I would like Canada and the provinces to explore and develop Canadian oil opportunities, I cannot support any exploration or development near Sable Island. It is unacceptable to put such a fragile part of our country at risk. Have you visited? Do you know what is at stake? You will show great strength if you can save this unique place for generations to reflect on how strength grows and beautiful things survive in unexpected places. The horses and other wildlife do not need any further challenges than they already face.

Best regards,  
Julie Oelmann
